Power Purchase Agreement — Havrebakke Wind Farm

Synthetic document, written to demonstrate a method. Fictional parties and figures. Not a real contract and not legal advice.

Execution version, 28 May 2026

between

Havrebakke Vind ApS (the Seller)

and

Jutland Board & Packaging A/S (the Buyer)

with the payment obligations of the Buyer guaranteed by **Jutland Industri Holding A/S** under the Parent Company Guarantee in Annex 4.

Part I sets out the commercial terms negotiated for this transaction and Part II the general provisions. Where they conflict, Part I prevails, and Annex 2 (Election Sheet) prevails on the matters it addresses.

Table of Contents

Part I — Individual Terms: Parties; Facility; Supply Period; Product and Certificates; Contract Quantity and Volume Structure; Price; Settlement; Delivery Point and Balancing; Credit Support; Governing Law; Annexes.

Part II — General Provisions:

1. Definitions and Interpretation
2. Conditions Precedent
3. Construction, Milestones and Commercial Operation
4. Delivery and Acceptance
5. Forecasting, Scheduling and Outages
6. Metering
7. Price, Invoicing and Payment
8. Guarantees of Origin
9. Credit Support
10. Force Majeure
11. Change in Law
12. Events of Default
13. Termination and Termination Amount
14. Limitation of Liability
15. Insurance
16. Assignment and Lender Protections
17. Taxes, Levies and Regulatory Costs

20. Governing Law and Dispute Resolution
21. Miscellaneous

Part I — Individual Terms

Parties

Seller: Havrebakke Vind ApS, a private limited company incorporated in Denmark, with its registered office in Ringkøbing-Skjern Municipality, Denmark.

Buyer: Jutland Board & Packaging A/S, a public limited company incorporated in Denmark, operating a corrugated board and packaging plant in Jutland. The Buyer does not hold a credit rating from a recognised rating agency.

Guarantor: Jutland Industri Holding A/S. The Buyer's payment obligations under this Agreement are guaranteed by Jutland Industri Holding A/S under the Parent Company Guarantee set out in Annex 4.

Facility

The Facility is the Havrebakke Wind Farm, consisting of eight onshore wind turbine generators with a total installed capacity of 48.0 MW located at Havrebakke in Ringkøbing-Skjern Municipality, Denmark, in bidding zone DK1, together with the internal cabling, the Havrebakke substation and the ancillary installations described in Annex 1.

Supply Period

Supply Period: twelve (12) years commencing on the Commercial Operation Date.

Target Commercial Operation Date: 1 October 2027.

Longstop Date: 31 March 2028.

Product and Certificates

Product: electricity generated by the Facility and delivered at the Delivery Point, together with all Guarantees of Origin issued in respect of the Metered Output. No capacity product, ancillary service or other attribute is sold under this Agreement.

Contract Quantity and Volume Structure

Volume structure: pay-as-produced. The Buyer shall purchase one hundred per cent (100%) of the Metered Output of the Facility during the Supply Period.

Expected Annual Production: 158,000 MWh (P50).

Minimum Annual Production: 118,500 MWh.

Price

The Contract Price is the price per MWh set out in Annex 2 (Election Sheet). Any adjustment of the Contract Price during the Supply Period is governed exclusively by Annex 2.

Settlement

Settlement: physical. Title to and risk in the electricity pass from the Seller to the Buyer at the Delivery Point.

Delivery Point and Balancing

Delivery Point: the metering point on the 60 kV side of the Havrebakke substation.

Balancing: the Buyer is responsible for balancing. The Buyer shall appoint the balance responsible party for the Facility and shall bear all imbalance costs from the Commercial Operation Date.

Credit Support

Seller: a bank guarantee of EUR 2,000,000 in the form set out in Annex 3, as described in section 9.1.

Buyer: the Parent Company Guarantee in Annex 4 and a letter of credit in the form set out in Annex 3, as described in section 9.2.

Governing Law

Danish law. Disputes are resolved by arbitration seated in Copenhagen, as set out in section 20.

Annexes

Annex 1 — Facility Description; Annex 2 — Election Sheet; Annex 3 — Form of Bank Guarantee and Form of Letter of Credit; Annex 4 — Parent Company Guarantee. All Annexes form part of this Agreement.

Part II — General Provisions

1. Definitions and Interpretation

1.1 In this Agreement the following capitalised terms have the meanings given below.

Affiliate means, in relation to a Party, any entity that controls, is controlled by or is under common control with that Party.

Business Day means a day other than a Saturday, a Sunday or a public holiday in Denmark on which banks in Copenhagen are open for general business.

Change in Law has the meaning given in section 11.1.

Commercial Operation Date means the date on which the Seller notifies the Buyer that the conditions in section 3.3 have been met.

Contract Price means the price per MWh set out in Annex 2 (Election Sheet), as adjusted from time to time in accordance with Annex 2.

Contract Year means the period from the Commercial Operation Date to the following 31 December, each subsequent calendar year, and the period from the last 1 January in the Supply Period to the last day of the Supply Period.

Deemed Delivered Electricity means the quantity of electricity, expressed in MWh, that the Facility would have generated during a period of reduced output instructed by the Buyer under section 5.4, calculated in accordance with section 5.6.

Defaulting Party and Non-Defaulting Party have the meanings given in section 12.1.

Expected Annual Production and Minimum Annual Production mean the quantities set out in Part I under the heading Contract Quantity and Volume Structure.

Financial Close means the date on which the Seller's financing agreements for the construction of the Facility have become unconditional and the first drawdown under them has been made.

Force Majeure has the meaning given in section 10.1.

Guarantee of Origin means a certificate issued by the Danish issuing body evidencing that one MWh of electricity has been produced from a renewable source.

Guarantor means Jutland Industri Holding A/S.

Letter of Credit and Bank Guarantee mean the instruments to be delivered under sections 9.2 and 9.1 in the forms set out in Annex 3.

Longstop Date means 31 March 2028.

Metered Output means the quantity of electricity, expressed in MWh, delivered by the Facility at the Delivery Point as recorded in accordance with section 6.

Parent Company Guarantee means the guarantee issued by the Guarantor in the form set out in Annex 4.

Reference Forward Price means, on any date, the arithmetic average of the forward prices for baseload electricity in bidding zone DK1 for each remaining Contract Year of the Supply Period, as quoted by at least three recognised market participants selected by the Non-Defaulting Party, adjusted for the production profile of the Facility by the factor set out in Annex 2.

Signing Date means 28 May 2026.

Target Commercial Operation Date means 1 October 2027.

Termination Amount has the meaning given in section 13.3.

Transmission System Operator means the entity responsible for the operation of the Danish electricity transmission system from time to time.

Delivery Point, Facility, Supply Period and Party have the meanings given in Part I, and Parties means the Seller and the Buyer together.

1.2 Headings are for convenience only. References to sections are to the sections of Part II. "Including" means "including without limitation". Days are calendar days unless Business Days are specified. Amounts are stated in euro.

2. Conditions Precedent

2.1 The obligations of the Parties under sections 3 to 9 are conditional on the satisfaction, or waiver by the Party entitled to its benefit, of each of the following Conditions Precedent:

(a) the Seller having obtained the construction permit and the environmental approval for the Facility in final form;

(b) the Seller having entered into a grid connection agreement for the Facility;

(c) the Seller having reached Financial Close;

(d) the Buyer having delivered the Parent Company Guarantee, duly executed by the Guarantor, to the Seller; and

(e) each Party having delivered to the other its corporate approvals for this Agreement.

2.2 Each Party shall use reasonable endeavours to satisfy the Conditions Precedent within its control and shall notify the other Party as each is satisfied.

2.3 If all Conditions Precedent have not been satisfied or waived by 31 December 2026, either Party may terminate this Agreement by written notice to the other Party, without liability of either Party except for a breach that occurred before termination.

2.4 Sections 1, 2, 18, 19, 20 and 21 are binding from the Signing Date.

3. Construction, Milestones and Commercial Operation

3.1 The Seller shall design, procure, construct, commission and test the Facility at its own cost and risk, in accordance with good industry practice, the permits and the grid connection agreement.

3.2 The Seller shall report to the Buyer on construction progress against the schedule in Annex 1 within ten (10) Business Days after the end of each calendar quarter from Financial Close until the Commercial Operation Date.

3.3 The Commercial Operation Date occurs when all eight wind turbine generators have passed their commissioning tests, the Facility is connected to the grid at the Delivery Point with the meters installed and verified, the Facility is registered with the Transmission System Operator and the Danish issuing body for Guarantees of Origin, and the Seller has given the Buyer written notice confirming this. The Seller shall give the Buyer at least thirty (30) days' notice of the expected Commercial Operation Date.

3.4 If the Commercial Operation Date has not occurred by the Target Commercial Operation Date of 1 October 2027, the Seller shall pay the Buyer liquidated damages of EUR 9,600 for each day of delay, up to an aggregate cap of EUR 1,750,000. The liquidated damages are the Buyer's sole remedy for delay, except for the right to terminate under section 3.6.

3.5 The Target Commercial Operation Date and the Longstop Date are extended day for day for any delay caused by Force Majeure or by a breach by the Buyer of this Agreement, up to a maximum of one hundred and eighty (180) days in aggregate.

3.6 If the Commercial Operation Date has not occurred by the Longstop Date, as extended under section 3.5, the Buyer may terminate this Agreement by written notice to the Seller. On such termination the Seller shall pay any liquidated damages accrued under section 3.4 and unpaid, and no Termination Amount is payable by either Party.

4. Delivery and Acceptance

4.1 The Seller shall sell and deliver, and the Buyer shall purchase and accept, the Metered Output at the Delivery Point throughout the Supply Period. The Buyer shall purchase one hundred per cent (100%) of the Metered Output of the Facility during the Supply Period. The Seller shall not sell electricity generated by the Facility to any other person during the Supply Period.

4.2 Delivery takes place at the Delivery Point, where title to and risk in the electricity pass to the Buyer, who is responsible for its offtake, transport, sale and use from that point.

4.3 The Seller does not guarantee any particular quantity of electricity in any hour, day or month; the Expected Annual Production is a P50 estimate used for sections 9.2 and 13.3 only.

4.4 The Seller shall operate and maintain the Facility in accordance with good industry practice so as to maximise the Metered Output.

4.5 If in any Contract Year the sum of the Metered Output and the Deemed Delivered Electricity is less than the Minimum Annual Production, the Seller shall pay the Buyer a shortfall payment equal to the shortfall in MWh multiplied by the amount, if positive, by which the average day-ahead price for bidding zone DK1 for that Contract Year exceeds the Contract Price, capped at EUR 500,000 per Contract Year. For the first and last Contract Year the Minimum Annual Production is reduced in proportion to the number of days in that Contract Year.

4.6 For the purposes of section 4.5 the Minimum Annual Production is further reduced by the electricity the Facility could not generate because of Force Majeure, reductions of output instructed by the Transmission System Operator or a breach by the Buyer, calculated under section 5.6.

5. Forecasting, Scheduling and Outages

5.1 From the Commercial Operation Date the Seller shall provide the balance responsible party with a production forecast for each hour of the following day by 09:00 Danish time and shall update it intraday whenever the expected output changes by more than 10 MW. The forecasts are given with reasonable care but without warranty.

5.2 The Buyer shall appoint the balance responsible party for the Facility and shall bear all imbalance costs from the Commercial Operation Date. The balance responsible party shall be registered for the Facility no later than thirty (30) days before the expected Commercial Operation Date, and the Seller shall provide it with the operational data it reasonably requests.

5.3 The Seller shall notify the Buyer of planned maintenance at least thirty (30) days in advance, scheduling it as far as practicable in periods of low wind, and of any unplanned outage affecting more than one turbine generator without undue delay.

5.4 The Buyer may instruct the Seller to reduce the output of the Facility for up to one hundred and fifty (150) hours per Contract Year, and the electricity that would otherwise have been generated during such hours shall be treated as Deemed Delivered Electricity and paid at the Contract Price. Each instruction shall be given at least two (2) hours in advance, stating the start time, duration and output level, and the Seller may refuse any instruction beyond the limit in this section.

5.5 Reductions of output instructed by the transmission system operator shall not give rise to any payment by the Buyer. Any compensation paid by the Transmission System Operator for such a reduction belongs to the Seller.

5.6 Deemed Delivered Electricity and any other deemed quantity under this Agreement are calculated from the wind measured at the Facility's meteorological mast, the turbine supplier's power curve, the availability of each turbine generator at the time and the electrical losses to the Delivery Point. The Seller shall provide the calculation with the invoice for the relevant month.

6. Metering

6.1 The Metering Equipment consists of a main meter and a check meter at the Delivery Point, owned by the Seller and compliant with the metering regulations applicable in Denmark. The readings of the main meter, as registered by the grid operator, are the basis for invoicing.

6.2 The Seller shall have the meters tested by an accredited body at least every three (3) years and otherwise at the Buyer's request and cost. If a meter is inaccurate beyond the permitted tolerance, the Seller shall repair or replace it and the readings since the last test, or for six (6) months, whichever is shorter, shall be corrected by reference to the check meter.

6.3 The Seller shall give the Buyer access to the hourly metering data for the Facility.

7. Price, Invoicing and Payment

7.1 The Contract Price is the price per MWh set out in Annex 2 (Election Sheet). The Contract Price applies to each MWh of Metered Output and to each MWh of Deemed Delivered Electricity. Any adjustment of the Contract Price during the Supply Period is made only as provided in Annex 2.

7.2 Within ten (10) Business Days after the end of each calendar month the Seller shall invoice the Buyer for the Metered Output and the Deemed Delivered Electricity of that month, stating the quantities in MWh, the Contract Price, the amount payable and value added tax.

7.3 The Buyer shall pay each invoice within twenty (20) days after receipt to the bank account stated in the invoice.

7.4 Any other amount payable under this Agreement shall be invoiced separately and paid within twenty (20) days after receipt of the invoice.

7.5 A Party that disputes an invoice in good faith shall pay the undisputed part by the due date and state its reasons within ten (10) Business Days after receipt. Any amount later found to be due bears interest under section 7.6 from the original due date.

7.6 Overdue amounts bear interest from the due date to the date of payment at the reference rate of the Danish central bank plus eight (8) percentage points per annum.

8. Guarantees of Origin

8.1 All Guarantees of Origin issued in respect of the Metered Output shall be transferred to the Buyer at no additional cost. The Seller shall register the Facility with the Danish issuing body before the Commercial Operation Date and shall transfer the Guarantees of Origin for each calendar month to the Buyer's registry account within fifteen (15) Business Days after their issue.

8.2 Guarantees of Origin are not issued for Deemed Delivered Electricity, and the Seller is not obliged to procure replacement Guarantees of Origin for any shortfall against the Expected Annual Production.

8.3 If the Guarantee of Origin scheme is replaced by another scheme evidencing the renewable origin of electricity, the Seller shall transfer to the Buyer the certificates issued under the replacement scheme in respect of the Metered Output, at no additional cost.

9. Credit Support

9.1 The Seller shall deliver a bank guarantee in the amount of EUR 2,000,000 within ten (10) Business Days after Financial Close, to remain in force until twelve (12) months after the Commercial Operation Date. The Bank Guarantee shall be issued by a bank with a long-term credit rating of at least A- or equivalent from a recognised rating agency, in the form set out in Annex 3. The Buyer may draw on it for any amount unpaid by the Seller under sections 3.4, 3.6 or 4.5 after ten (10) Business Days' written notice.

9.2 The Buyer's payment obligations under this Agreement are guaranteed by Jutland Industri Holding A/S under the Parent Company Guarantee set out in Annex 4. The Buyer shall deliver a letter of credit in an amount equal to nine (9) months of expected payments under this Agreement, calculated as nine twelfths of the Expected Annual Production multiplied by the Contract Price in force at the time of calculation, no later than thirty (30) days before the expected Commercial Operation Date, to remain in force until sixty (60) days after the end of the Supply Period. The Letter of Credit shall be issued by a bank with a long-term credit rating of at least A- or equivalent from a recognised rating agency, in the form set out in Annex 3, and its amount is recalculated on 1 January of each Contract Year to reflect the Contract Price then in force.

9.3 The Seller may draw on the Letter of Credit for any amount due and unpaid by the Buyer after ten (10) Business Days' written notice of non-payment. After a drawing the Buyer shall restore the Letter of Credit to the required amount within ten (10) Business Days.

9.4 If the issuing bank of the Bank Guarantee or the Letter of Credit loses the required rating, or if the instrument is not extended at least thirty (30) days before an expiry falling before the required date, the Party that delivered it shall replace it within twenty (20) Business Days, failing which the other Party may draw the full amount as cash security.

9.5 If the Guarantor ceases to hold the entire share capital of the Buyer, or the Parent Company Guarantee ceases to be in force, the Buyer shall within twenty (20) Business Days deliver a replacement guarantee acceptable to the Seller, acting reasonably, or double the amount of the Letter of Credit.

10. Force Majeure

10.1 Force Majeure means an event beyond the reasonable control of the affected Party that it could not reasonably have prevented or overcome and that prevents or delays the performance of its obligations under this Agreement, including natural disaster, storm beyond the design parameters of the Facility, fire, war, terrorism, epidemic, strike other than one limited to the affected Party's own workforce, and failure of the grid beyond the Delivery Point. Force Majeure does not include lack of funds, a change in market prices or insufficient wind.

10.2 The affected Party shall notify the other Party within five (5) Business Days, stating the event, its expected duration and the obligations affected, and shall use reasonable endeavours to mitigate its effects.

10.3 The obligations of the affected Party, other than payment of amounts already due, are suspended for as long as the Force Majeure prevents their performance. No payment for undelivered electricity, shortfall payment or liquidated damages accrues for the period of Force Majeure.

10.4 If an event of Force Majeure continues for more than one hundred and eighty (180) consecutive days, either Party may terminate this Agreement by written notice to the other Party with thirty (30) days' effect, and no Termination Amount is payable by either Party on such termination.

11. Change in Law

11.1 Change in Law means the enactment, amendment, repeal or change in interpretation by a court or authority of any Danish or European Union law, regulation, grid code or tariff after the Signing Date, including any change in the rules governing Guarantees of Origin, grid tariffs or the taxation of electricity generation, but excluding any change in corporate income tax of general application and any change published in final form before the Signing Date.

11.2 If a Change in Law increases the cost to a Party of performing this Agreement by more than EUR 250,000 in any Contract Year, the Parties shall negotiate in good faith an adjustment to restore the economic balance of this Agreement, which may include an adjustment to the Contract Price. The Party invoking this section shall document the cost increase.

11.3 If the Parties have not agreed an adjustment within ninety (90) days after the notice invoking section 11.2, the affected Party may terminate this Agreement by written notice to the other Party with sixty (60) days' effect, and no Termination Amount is payable by either Party on such termination.

12. Events of Default

12.1 Each of the following is an Event of Default in respect of a Party (the Defaulting Party, the other Party being the Non-Defaulting Party):

(a) the Party fails to pay an amount due under this Agreement and the failure continues for ten (10) Business Days after written notice of non-payment from the other Party;

(b) the Party fails to deliver, restore or replace credit support under section 9 within ten (10) Business Days after written notice;

(c) the Party is declared bankrupt, enters into reconstruction or liquidation proceedings, or is unable to pay its debts as they fall due;

(d) the Party breaches a material obligation under this Agreement, other than one referred to in (a) to (c), and fails to remedy the breach within thirty (30) days after written notice;

(e) the Party assigns or transfers this Agreement in breach of section 16;

(f) in respect of the Seller, the Commercial Operation Date has not occurred by the Longstop Date, as extended under section 3.5, or the Seller sells electricity generated by the Facility to a third party in breach of section 4.1; and

(g) in respect of the Buyer, the Guarantor becomes subject to an event of the kind described in (c), or the Parent Company Guarantee ceases to be valid and enforceable and is not replaced under section 9.5.

12.2 An Event of Default is not treated as occurring to the extent that the relevant failure is caused by Force Majeure or by a breach by the other Party.

13. Termination and Termination Amount

13.1 This Agreement enters into force on the Signing Date and, unless terminated earlier under its terms, ends at the end of the Supply Period.

13.2 While an Event of Default continues, the Non-Defaulting Party may terminate this Agreement by written notice to the Defaulting Party specifying the Event of Default and an early termination date not less than ten (10) and not more than thirty (30) days after the notice. The Non-Defaulting Party may also suspend its own performance, other than payment for electricity delivered, while the Event of Default continues.

13.3 The Termination Amount shall be the present value of the difference between the Contract Price and the Reference Forward Price for the Expected Annual Production over the remainder of the Supply Period, discounted at the reference rate of the Danish central bank plus two (2) percentage points, and determined by the Non-Defaulting Party as at the early termination date, acting in good faith and in a commercially reasonable manner. Where the early termination date falls before the Commercial Operation Date, the remainder of the Supply Period is measured from the Target Commercial Operation Date.

13.4 If the Termination Amount represents a loss for the Non-Defaulting Party, the Defaulting Party shall pay it to the Non-Defaulting Party within twenty (20) Business Days after receiving a statement showing the calculation and the quotations used. If it represents a gain for the Non-Defaulting Party, no Termination Amount is payable by either Party.

13.5 The Termination Amount is in addition to amounts accrued and unpaid at the early termination date, but is the exclusive remedy for the loss of the bargain.

13.6 Termination under sections 2.3, 3.6, 10.4 or 11.3 does not give rise to a Termination Amount. On any termination the credit support is released once all amounts due have been paid.

13.7 Sections 7, 13, 14, 18, 19, 20 and 21 survive the termination or expiry of this Agreement.

14. Limitation of Liability

14.1 Neither Party is liable to the other for loss of profit or any indirect or consequential loss, except to the extent included in the liquidated damages, the shortfall payment or the Termination Amount.

14.2 The aggregate liability of each Party under this Agreement in any Contract Year, excluding the Termination Amount, liquidated damages under section 3.4 and payment for electricity delivered, is limited to EUR 2,000,000.

14.3 The limitations in this section 14 do not apply to liability for fraud, wilful misconduct or gross negligence.

15. Insurance

15.1 From Financial Close the Seller shall maintain construction all-risks insurance for the Facility and, from the Commercial Operation Date, property damage and business interruption insurance

covering the Facility for its full replacement value, together with third-party liability insurance of at least EUR 10,000,000 per occurrence, on terms customary for onshore wind farms in Denmark.

15.2 The Seller shall provide the Buyer with certificates of insurance on request and shall notify the Buyer of any cancellation or material reduction of cover.

16. Assignment and Lender Protections

16.1 Neither Party may assign or transfer this Agreement without the prior written consent of the other Party, not to be unreasonably withheld, except as provided in this section 16.

16.2 The Seller may assign its rights under this Agreement by way of security to the lenders financing the Facility, and may assign this Agreement to a successor that acquires the Facility and assumes all obligations of the Seller, provided that the successor has a financial standing at least equivalent to that of the Seller.

16.3 The Buyer may assign this Agreement to an Affiliate covered by the Parent Company Guarantee or delivering replacement credit support acceptable to the Seller, acting reasonably.

16.4 On request of the Seller, the Buyer shall enter into a direct agreement with the Seller's lenders on customary terms, under which the Buyer gives the lenders notice of any Event of Default of the Seller and not less than sixty (60) days in which to remedy it or transfer this Agreement to a substitute seller before the Buyer terminates.

17. Taxes, Levies and Regulatory Costs

17.1 The Contract Price is exclusive of value added tax, which the Buyer shall pay in addition where applicable.

17.2 The Seller bears all taxes, levies and charges imposed on the generation of electricity and on its injection into the grid at the Delivery Point. The Buyer bears all those imposed on the offtake, transport, consumption or resale of electricity from the Delivery Point, including the charges of the balance responsible party.

17.3 Any new tax, levy or charge introduced after the Signing Date is allocated under section 17.2 and is subject to section 11 where it meets the threshold in section 11.2.

18. Confidentiality

18.1 Each Party shall keep confidential the terms of this Agreement and all information received from the other Party in connection with it, and shall not disclose them without the prior written consent of the other Party.

18.2 A Party may disclose confidential information to its Affiliates, lenders, insurers, auditors and advisers bound by equivalent obligations, and to the extent required by law, a court, a regulatory authority or the Transmission System Operator.

18.3 This section 18 applies for three (3) years after the end of this Agreement.

19. Notices

19.1 Notices under this Agreement shall be in writing in English or Danish and sent by courier, registered post or e-mail to the addresses set out below or as later notified by a Party.

19.2 Seller: Havrebakke Vind ApS, attention the Managing Director, at its registered office. Buyer: Jutland Board & Packaging A/S, attention the Chief Financial Officer, at its registered office.

19.3 A notice is deemed received on delivery by courier, on the second Business Day after posting, or on the Business Day of sending if sent by e-mail before 16:00 Danish time.

20. Governing Law and Dispute Resolution

20.1 This Agreement is governed by the laws of Denmark, excluding its conflict-of-law rules and the United Nations Convention on Contracts for the International Sale of Goods.

20.2 The Parties shall seek to resolve any dispute arising out of this Agreement by negotiation between senior representatives within thirty (30) days after a written request from either Party.

20.3 Any dispute not resolved under section 20.2 shall be finally settled by arbitration seated in Copenhagen under the rules of a recognised Danish arbitration institute, before three arbitrators, in the English language.

20.4 Disputes concerning metering data or a calculation under section 5.6 may be referred to an independent technical expert appointed jointly by the Parties, whose determination is binding unless manifestly incorrect.

21. Miscellaneous

21.1 This Agreement constitutes the entire agreement between the Parties on its subject matter and supersedes all earlier drafts, term sheets and discussions.

21.2 Amendments to this Agreement must be in writing and signed by both Parties.

21.3 If a provision of this Agreement is invalid, the remaining provisions are unaffected and the Parties shall replace it with a valid provision of the closest economic effect.

21.4 A failure or delay in exercising a right under this Agreement does not operate as a waiver of that right. Nothing in this Agreement creates a partnership or agency between the Parties.

21.5 This Agreement is signed in two originals, one for each Party, or electronically.

Annex 1 — Facility Description

Name: Havrebakke Wind Farm.

Location: Havrebakke, Ringkøbing-Skjern Municipality, Denmark. Bidding zone DK1.

Technology: eight onshore wind turbine generators, each with a rated capacity of 6.0 MW, a hub height of 125 metres and a rotor diameter of 162 metres, with internal 33 kV cabling, the Havrebakke substation with a 33/60 kV transformer, and a meteorological mast.

Total installed capacity: 48.0 MW.

Grid connection: 60 kV connection from the Havrebakke substation to the regional grid. Delivery Point: the metering point on the 60 kV side of the Havrebakke substation.

Expected Annual Production: 158,000 MWh (P50), based on the wind resource assessment for the Seller's financing, after wake losses, availability of 97 per cent and electrical losses to the Delivery Point.

Minimum Annual Production: 118,500 MWh, corresponding to 75 per cent of the Expected Annual Production.

Construction schedule: Financial Close 30 September 2026; foundations complete 30 April 2027; turbines erected 31 July 2027; grid connection energised 15 August 2027; Commercial Operation Date 1 October 2027.

Annex 2 — Election Sheet

This Annex 2 contains the price and the commercial elections for this Agreement. Where this Annex and any other part of this Agreement conflict in respect of a matter addressed here, this Annex prevails.

Contract Price: EUR 54.50 per MWh, exclusive of value added tax, applicable to each MWh of Metered Output and of Deemed Delivered Electricity from the Commercial Operation Date.

Indexation: Thirty per cent (30%) of the Contract Price shall be adjusted on 1 January of each Contract Year from 2029 by the percentage change in the Danish consumer price index over the preceding calendar year. The remaining seventy per cent (70%) of the Contract Price is fixed for the Supply Period. The Seller shall notify the Buyer of the adjusted Contract Price, with the calculation, within ten (10) Business Days after the index for December of the preceding year has been published.

Volume structure: pay-as-produced; one hundred per cent (100%) of the Metered Output.

Buyer reduction of output: up to one hundred and fifty (150) hours per Contract Year under section 5.4, paid as Deemed Delivered Electricity at the Contract Price.

Production profile factor for the Reference Forward Price: 0.88.

Settlement: physical. Delivery Point: the metering point on the 60 kV side of the Havrebakke substation. Balance responsible party: appointed by the Buyer under section 5.2.

Invoicing: monthly in arrears; payment within twenty (20) days.

Seller credit support: Bank Guarantee of EUR 2,000,000 under section 9.1. Buyer credit support: Parent Company Guarantee under Annex 4 and Letter of Credit under section 9.2.

Liability cap under section 14.2: EUR 2,000,000 per Contract Year.

Annex 3 — Form of Bank Guarantee and Form of Letter of Credit

Part A — Form of Bank Guarantee (Seller)

To: Jutland Board & Packaging A/S (the Beneficiary). We, the undersigned bank, refer to the Power Purchase Agreement dated 28 May 2026 between Havrebakke Vind ApS (the Applicant) and the Beneficiary (the Agreement).

1. We irrevocably and unconditionally undertake to pay to the Beneficiary, on first written demand, any amount or amounts not exceeding in aggregate EUR 2,000,000 (two million euro).

2. A demand shall state that the Applicant has failed to pay an amount due under sections 3.4, 3.6 or 4.5 of the Agreement after ten (10) Business Days' written notice of non-payment, and the amount demanded. We shall pay within five (5) Business Days after receipt of a conforming demand, without verifying the underlying facts.

3. This guarantee is valid until twelve (12) months after the Commercial Operation Date as notified to us by the Beneficiary. It is governed by Danish law.

Part B — Form of Letter of Credit (Buyer)

To: Havrebakke Vind ApS (the Beneficiary). We, the undersigned bank, issue this irrevocable standby letter of credit at the request of Jutland Board & Packaging A/S (the Applicant) under the Power Purchase Agreement dated 28 May 2026 between the Applicant and the Beneficiary (the Agreement).

1. We irrevocably undertake to pay to the Beneficiary, on first written demand, any amount or amounts not exceeding in aggregate the amount stated in the schedule to this letter of credit, as amended from time to time with our consent to reflect the recalculation under section 9.2 of the Agreement.

2. A demand shall state that the Applicant has failed to pay an amount due under the Agreement after ten (10) Business Days' written notice of non-payment, and the amount demanded. We shall pay within five (5) Business Days after receipt of a conforming demand, without verifying the underlying facts.

3. This letter of credit is valid until the expiry date stated in the schedule and is automatically extended for successive periods of one year unless we give the Beneficiary at least sixty (60) days' notice that it will not be extended, in which case the Beneficiary may demand the full undrawn amount before the current expiry date. It is governed by Danish law.

Annex 4 — Parent Company Guarantee

This guarantee is given on 28 May 2026 by Jutland Industri Holding A/S, a public limited company incorporated in Denmark (the Guarantor), in favour of Havrebakke Vind ApS (the Seller).

1. The Guarantor is the sole shareholder of Jutland Board & Packaging A/S (the Buyer). The Seller has entered into the Power Purchase Agreement dated 28 May 2026 relating to the Havrebakke Wind Farm (the Agreement) in reliance on this guarantee.

2. The Guarantor irrevocably and unconditionally guarantees to the Seller, as primary obligor and not merely as surety, the due and punctual payment by the Buyer of all amounts that are or become payable by the Buyer under the Agreement, including payment for electricity delivered, the Termination Amount and interest.

3. If the Buyer fails to pay an amount when due, the Guarantor shall pay it to the Seller within ten (10) Business Days after written demand stating the amount, the basis of the claim and that the Buyer has failed to pay.

4. The obligations of the Guarantor are not affected by any amendment of the Agreement, any indulgence granted to the Buyer, any insolvency of the Buyer or any other act that would otherwise discharge a guarantor.

5. The aggregate liability of the Guarantor under this guarantee shall not exceed the aggregate liability of the Buyer under the Agreement.

6. This guarantee remains in force until all amounts payable by the Buyer under the Agreement have been paid in full. The Guarantor shall provide the Seller with its audited annual accounts within six (6) months after the end of each financial year.

7. The Seller may assign the benefit of this guarantee to its lenders and to any successor under section 16.2 of the Agreement.

8. This guarantee is governed by Danish law. Disputes are settled by arbitration in accordance with section 20 of the Agreement, which applies to this guarantee as if the Guarantor were a Party.
