Investment committee paper — key terms, Havrebakke Wind Farm

Synthetic document, written to demonstrate a method. Fictional parties and figures. Not a real contract and not legal advice.

Project: Havrebakke Wind Farm, 48 MW onshore, Denmark (DK1)

Paper for: Investment Committee, meeting of 18 June 2026

Section: 4.2 Revenue contract — key terms

Source for this table: legal due diligence summary dated 4 June 2026 (Søbredden Advokatpartnerselskab) and the financial model v7

#	Term	Key terms as modelled
1	Parties and buyer credit	Buyer Jutland Board & Packaging A/S, unrated; parent guarantee from Jutland Industri Holding A/S
2	Facility	8 turbines, 48.0 MW, Ringkøbing-Skjern, DK1
3	Supply period	10 years from COD
4	COD and delay	Target COD 1 Oct 2027; longstop 31 Mar 2028; LDs EUR 9,600/day, cap EUR 1.75m
5	Price	EUR 54.50/MWh; 30 % CPI-indexed from 2029
6	Volume	Pay-as-produced, 100 % of output; P50 158 GWh/yr; minimum 118.5 GWh/yr
7	Product	Electricity + all GoOs to buyer
8	Curtailment	Buyer right 150 h/yr, compensated at contract price; TSO

		curtailment uncompensated
9	Delivery and balancing	Physical, 60 kV Havrebakke substation; buyer is BRP and bears imbalance
10	Credit support	Seller bank guarantee EUR 2,500,000 to COD + 12 months; buyer LC 9 months of payments
11	Termination	Mark-to-market vs forward curve for remaining term
12	Change in law / FM	Renegotiation above EUR 250k/yr, then mutual termination right without termination amount; FM > 180 days termination right

Modelling note: the base case runs the contract price for ten years and merchant DK1 forward prices thereafter. Sensitivities 4.4 and 4.5 show the case at P90 production and at a two-year merchant tail.
